PROFESSIONAL PROFILE

AI Agent & Automation Developer focused on Python-based agents, workflow engineering, and AI-assisted development. I build practical systems that connect language models, business APIs, and everyday tools to simplify operations and support clear, useful workflows.

CORE EXPERTISE

Python AI Agents

Task-oriented agents that connect language models with tools and business APIs, supported by clear execution paths and human review.

Workflow Engineering

n8n-based workflows that connect business tools, organize information, and reduce repetitive manual steps.

AI-Assisted Development

Vibe coding and iterative development to translate defined business needs into practical interfaces and tools.

Systems Integration

API and tool connections that support structured handoffs between agents, workflows, and business applications.

TECHNICAL TOOLKIT

Development	Python · JavaScript · TypeScript · SQL · Git · GitHub
AI & Automation	Python agents · n8n · LLM APIs · Tool calling · Workflow design
Tools & Ecosystem	OpenAI · LangChain · FastAPI · Docker · React · Node.js
Professional Skills	Problem solving · Critical thinking · Communication

EDUCATION

Virtual University — Lahore, Pakistan

PROFESSIONAL FOCUS

Practical business automation, connected operations, and maintainable tools. My approach starts with a defined task, connects the right components, and refines the result through testing.

AI AGENT DEVELOPMENT · WORKFLOW ENGINEERING · PRACTICAL AUTOMATION
